

## THE IMPORTANCE OF WALKING

- ☞ Walking can add minutes to your life. It enables you at 85 years old to spend an additional 5 months in a nursing home at \$7000 per month.
- ☞ I like long walks, especially when they are taken by people who annoy me.
- ☞ The only reason I would take up walking is so that I could hear heavy breathing again.
- ☞ I have to walk early in the morning, before my brain figures out what I'm doing.
- ☞ Every time I hear the dirty word 'exercise', I wash my mouth out with chocolate.
- ☞ I know I got a lot of exercise the last few years,..... just getting over the hill.
- ☞ We all get heavier as we get older, because there's a lot more information in our heads.
- ☞ Every time I start thinking too much about how I look, I just find a Happy Hour and by the time I leave, I look just fine.

**THE SOUTH JERSEY DEVILER**  
"SOUTH JERSEY'S #1 FUNNY PAPER"

Email us your FUNNY Joke/Story/Picture and if we print it we'll send you a FREE Deviler Bumper Sticker. You can stick it just about anywhere! thesjdeviler@aol.com subject: 'My Funny'

### As I Get Older

1. I don't need anger management. I need people to stop pissing me off.
2. My people skills are just fine. It's my tolerance for idiots that needs work.
3. I have days when my life is just a tent away from a circus.
4. These days, "on time" is when I get there.
5. Even duct tape can't fix stupid... but it sure does muffle the sound.
6. Lately, I've noticed people my age are so much older than me.

**Just remember, once you're over the hill you begin to pick up speed.**

### BACK PAGE NEWS You May Have Missed?

**Crop Circles;** Information that was presented recently about Crop Circle Truths constitutes grounds for persecution by powerful organizations intent on burying genuine scientific research into the crop circle phenomenon. One such case involves early researcher William "Lefty" Levensood, who investigated plants and soils from the 1950s until his death in 2013. Although, he holds the record for most scientific articles published you've probably never heard of him. The scientific community spurned his findings and denied him his Ph.D. in an effort to discredit him academically. Perhaps the most significant discovery of the early circle research resulted—as is often the case in science—when Levensood accidentally forgot to dispose of boxed left-over crop circle samples which had been deprived of water and light for between 10-14 days—and his observation upon re-opening the box that the circle plants so deprived were not only alive, but growing vigorously... while the controls had all died. He eventually was able to reproduce this effect in the lab—creating enhanced growth-rate, increased yield, and increased “stress tolerance” (the ability to withstand drought and lack of sun-light)—in a variety of cereals and vegetables by exposing normal seed to very specific electrical pulses. Named the “MIR process” (Patent #5740627, and carrying the registered trademark “Stressguard”), the MIR equipment delivers “organized electron-ion avalanches” which then form “organized plasmas,” to which the normal seeds are exposed.

**ONE QUESTION:** If Electric cars do not use gas, they will not participate in paying a gas tax on every gallon that is sold for automobiles, which was enacted years ago to help to maintain our roads and bridges. They will use the road, but will not pay for their maintenance! *So, Who Will Bear The Burden?*

**American Christian Evangelist Billy Graham (11/7/18~2/21/18)** said, "Someday you will read or hear that Billy Graham is dead. Don't you believe a word of it. I shall be more alive than I am now. I will just have changed my address. I will have gone into the presence of God."

**Sections of the US/Mexico wall does exist in many areas...** Boarder patrol officials in the these areas have witnessed bags of drugs being catapulted over the boarder walls into the United States. Some bags weighing over 65lbs.! To date, not one Boarder Patrol Agent has hit on the head!
