

THANK GOD FOR THE INTERNET!

With the birth of the internet and the explosion of social media, the curtain has been pulled back on the controlling powers in the world.

Their constant, malicious deceptions have been exposed.

Most of us can remember how only a few short years ago, most Americans blithely accepted as truth whatever the press and our leaders told us. Now we know that, in fact, little of what the mainstream media or the politicians tell us is true. And if it is true, they are only telling us the portion of it that furthers their ambitions.

sjd

Economics College Professor Fails Entire County College Class:

According to a local newspaper reporter: The professor made a statement that he had never failed a single student before, but had recently failed an entire class. Seems that class had insisted that socialism worked and that no one would be poor and no one would be rich, a great equalizer.

So, the professor then conducted an experiment in the class. He told them that all grades will be averaged and everyone will receive the same grade so no one will fail and no one will receive an A. (He substituted grades for dollars, so that the students would more readily understand the concept).

After the first test, the grades were averaged and everyone got a B. The students who studied hard were upset and the students who studied little were happy.

As the second test rolled around, the students who studied little had studied even less and the ones who studied hard decided they wanted a free ride too, so they studied little. The second test average was a D! No one was happy.

As the tests proceeded, the scores never increased as bickering, blame and name-calling all resulted in hard feelings and no one would study for the benefit of anyone else. To their great surprise, ALL failed and the professor told them that socialism would also ultimately fail because when the reward is great, the effort to succeed is great, but when government takes all the reward away, no one will try or want to succeed.

Following are possibly the 5 best sentences that you will probably find applicable to this experiment:

1. You cannot legislate the poor into prosperity by legislating the wealthy out of prosperity.
2. What one person receives without working for, another person must work for without receiving.
3. The government cannot give to anybody anything that the government does not first take from somebody else.
4. You cannot multiply wealth by dividing it!
5. When half of the people get the idea that they do not have to work because the other half is going to take care of them, and when the other half gets the idea that it does no good to work because somebody else is going to get what they work for, that is the beginning of the end of any nation.

If you want to make everyone happy, don't be a leader.

How will we recognize the end of the age?

"See to it that no one misleads you...." (Matthew 24:4)

Socialism in the 21st. Century of United States of America:

- America is capitalist and greedy-yet half of the population is subsidized.
- Half of the population is subsidized-yet they think they are victims.
- They think they are victims-yet their representatives run the government.
- Their representatives run the government-yet the poor keep getting poorer.
- The poor keep getting poorer-yet they have things that people in other countries only dream about.
- They have things that people in other countries only dream about-Yet they want America to be more like those other countries.

1/28/19: In what has been called a "strong message" to President Trump, the new socialist-controlled House of Representatives has passed the "NATO Support Act (H.R. 676) by a vote of 357 to 22.

So while the House (Pelosi) has resisted paying for a wall to defend the sovereignty of the US, the House has voted overwhelmingly to defend the borders of countries in Europe. This demonstrates their priorities: open borders for the U.S. and secure borders for the rest of the world, to be guaranteed by American fighting men and women.

Need Kindling?

Doritos Chips are flammable and can start a fire if you're in need of kindling. The oil and seasoning on the chips, especially the spicy varieties, can actually produce a reasonably long-lasting fire.
